Professional Summary

Data Analyst at **Google** (gTech Ads CX) with experience in analyzing large-scale data and driving performance optimization for enterprise clients via agentic automation. Advanced proficiency in SQL, Python, Statistical Modelling, Data Engineering and data visualization, with expertise in Generative AI, Inference and Modelling, dashboarding, and advanced analytics (User Flow, RCA, conversions). Proven ability to translate complex datasets into actionable insights and influence strategic business decisions.

Work Experience

Data Analytics Apprentice

March 2026 – Present

Google

Hyderabad, India

- Working as a Data Analytics Apprentice in the **gTech Ads CX** team at Google, supporting Large Customer Sales with data-driven insights.
- Evaluating campaign metrics and user behavior to optimize targeting, bidding strategies, and ROAS. Supported clients in improving account structure and campaigns.
- Built dashboards and automated reports to monitor KPIs and improve decision-making for client accounts.
- Working on internal automation tools for SQL Generation and deterministic validation using Agentic AI, SQLGlot, Cloud Computing and Advanced statistical methods

Digital Analyst

Dec 2024 – March 2026

Tatvic Analytics

Ahmedabad, India

- Analyzed multi-channel datasets in **GA4, BigQuery, and SQL**, uncovering conversion gaps and driving data-backed marketing strategies for leadgen and publisher clients, improving CVR by 4–5%.
- Built **automated workflows** with **n8n** and **Agentspace**, eliminating manual reporting by 60% and enabling faster client decisions.
- Performed **root cause analysis (RCA)** to resolve anomalies across client reports, reducing data discrepancy by 80–90%.
- Delivered 10+ advanced **martech analyses** (attribution, cohort, funnel) using SQL and statistics.
- Improved **data pipelines and processes**, reducing latency and documenting templates for scalable and reproducible analysis.

Computer Vision and Data Engineer

Jul 2024 – Dec 2024

Codenscious Technologies

Indore, India

- Contributed to **Legolas**, a YOLO-powered pothole detection system with an mAP of 95%, geospatial tagging, and dashboards for real-time road condition monitoring.
- Designed and optimized a **CV pipeline**, integrating **IoT, computer vision, and data analytics**, showcasing scalability.
- Conducted research on **SLAM and ROS2 simulations**, assessing model accuracy and applicability.

Data Science Research Intern

July 2023 - July 2024

Center of Advanced Research and Engineering, IIST

Indore, India

- Worked on Brain Computer Interface Research focusing on cognitive effects of voluntary actions by studying EEG Signals
- Utilized Deep Learning, Data Science, Signal Processing and Data Visualization Tools to complete research objectives.

Key Projects

NeuroTetris: BCI-Controlled Gaming System

Aug 2023 – Jun 2024

- Conducted research on **EEG signal processing**, applying statistical modeling and machine learning to classify neural patterns with 80% accuracy.
- Performed **EDA** on EEG datasets to evaluate noise, variability, and feature importance, improving model robustness.
- Implemented **signal filtering, feature extraction, and real-time control mapping** in Python.

Tesseract: Legal Document Summarizer and Translator

May 2024 – Jun 2024

- Built an end-to-end **Flask application** for automated legal document analysis using **OCR, image preprocessing, and natural language processing**.
- Applied a **BERT-based transformer model** trained on the **ILDC dataset** to generate concise, context-aware summaries while preserving key legal information.
- Integrated **Google Translate API** to provide multilingual summaries, improving accessibility of legal content across regional languages.

Publications

A Method for Doctor's Handwritten Text Recognition by Utilizing Deep Learning and Ambiguity Handling

Jun 2026

- Published research in the ACM Digital Library on applying **deep neural networks** for handwritten medical text recognition and document understanding.
- Investigated **ambiguity-aware recognition methods** to improve interpretation of complex and context-dependent clinical handwriting.
- Applied techniques from **computer vision, OCR, and natural language processing** to healthcare document intelligence problems.
- Co-authored and presented findings on improving automated extraction of information from handwritten medical records.

Technical Skills

- Programming:** Python, R, Bash, SQL, C++
- Data Analytics & Visualization:** Data Wrangling, Data Visualization, Statistical Analysis and Modeling, Exploratory Data Analysis (EDA), Dashboarding, GA4, Google Ads, Data Validation, Root Cause Analysis
- Data Science and Machine Learning :** Scikit-learn, TensorFlow, Deep Learning, PyTorch, Generative AI, Prompt Engineering, Computer Vision, Model Evaluation, Feature Engineering, Agentic AI, statsmodels
- Big Data & Data Engineering:** Big Data Analytics, Hadoop, PySpark, Data Pipelines, ETL Workflows, Data Processing, Data Quality Checks
- Software Development & MLOps:** Flask, Streamlit, Docker, REST APIs, System Design, MLOps , CI/CD, Model Deployment
- Cloud & Tools:** GCP, Authentication, BigQuery, Azure Databricks, Git, Linux, Google Agentspace, Google AI Studio
- Specialized Domains:** Image Processing, ROS, Raspberry Pi, Networking, Data Structures, Algorithm Optimization

Education

Indore Institute of Science and Technology	May 2025
<i>B.Tech. in Artificial Intelligence and Machine Learning (CGPA: 8.03/10)</i>	<i>Indore, Madhya Pradesh, India</i>

Certifications & Leadership

- Google Certified Data Analytics Professional and Advanced Data Analytics Professional**
Certified in **Python for Data Science** and **Data Science: Inference and Modelling** by Harvard University (edX).
- Google Certified Prompt Engineering Professional and AI Professional**
- Best Paper Award:** "Neural Signatures of Eye Blinking: EEG Analysis for Inferencing Complex Cognitive Processes."
- Winner, Smart India Hackathon (SIH) 2023: Software Edition** — Ministry of Defence's Computer Vision Problem Statement.
- Google Developer Student Clubs (GDSC) Lead (2023–24)** and **CodeChef IIST Chapter Lead (2024–25)**.
- CCNA Certified** for "Introduction to Networks", "Switching, Routing and Wireless Essentials", and "Enterprise Networking Security and Automation"
- Spot Award** for Exceptional Performance as a Consultant and Data Analyst at Tatvic
